

Application Development and Management

Delivering Value Through Accelerated Time-to-Market

AgreeYa Solutions leverages proven methodologies, innovative technologies and a flexible delivery model to create customized solutions for its customers. Unlike off-the-shelf products, custom solutions are built to exactly match and support customers' unique business processes for maximum efficiency.

AgreeYa's application development and management services produce and support high-quality custom solutions in minimum turnaround time, at reduced costs, providing a greater return on investment (ROI). AgreeYa's technology specialists have proven experience building complex software projects across all industries using standard development methodologies. AgreeYa provides mature processes, proven tools and certified experts to ensure superior quality, performance and productivity. Its portfolio of application development and management services cover the full spectrum of software development lifecycles including assessment to solution design, development, implementation and support/management. AgreeYa's flexible onsite-offsite-offshore (O3) delivery model coupled with the industry's best practices and standards including ISO, CMMI and PMI provide a high quality, high ROI solutions for customers.

- Repository framework of reusable components to speed up the development process and reduce overall costs
- "Global but local" model to deliver round the clock development and support

Success Stories

▶ Delivered a highly scalable web based calendaring application for one of America's leading financial and services holding company. The application helped simplify appointment tracking and sharing enabling teams to work faster and easily keep track of important tasks and deadlines.

▶ A cross-platform, cross-device web application for one of the largest public utilities company in the US. The web app helped enable an online self-service facility for consumers to submit online service requests for expansion or relocation of existing power grids, pay bills and view service outages.

▶ Intuitive, highly scalable and responsive vendor portal application for one of America's largest Publications and Media Company. The portal helped automate and simplify vendor management processes such as vendor registration, processing and onboarding resulting in increased employee productivity and faster go-to-market.

▶ Delivered a cross-platform, highly intuitive web based Refrigerant Registration and Reporting application for a leading state regulatory agency. The application helped automate essential regulatory processes leading to faster exchange of information between business units and participating agency by as much as 40%.
