

**AgreeYa Solutions helps organizations enhance collaborative environments and information sharing with Microsoft SharePoint solutions.**

Collaborative environments, information sharing, social interaction and streamlined content management are all critical elements of enhanced productivity and growth. As a Microsoft Gold Certified Partner, AgreeYa delivers expertise and solution-based consulting with Microsoft tools and technologies to implement SharePoint for organizations worldwide.

Leveraging our Microsoft information technology lab (iLab) and our global delivery model, AgreeYa improves effectiveness of client companies, implementing comprehensive content management, enterprise search, acceleration of integrated business processes and enabling information sharing across departments – through Microsoft SharePoint and a suite of complimentary solutions.

AgreeYa's proprietary Executive Assessment is the first step toward understanding the client's business needs and current technology environment. The findings of this Assessment enable AgreeYa to more accurately and effectively articulate a solution that best supports the client's business objectives and create a roadmap for the client to best leverage Microsoft SharePoint solutions.

### **AgreeYa's SharePoint service offerings include:**

- Executive Assessment and viability analysis
- Architecture strategy and planning
- Migration of MOSS WSS, 2000/2003, 2007 to 2010
- Strategic outsourcing for support and maintenance
- Customization and configuration
- User interface design
- SharePoint Workflows
- Portal enhancement and content update
- SharePoint Web and .Net Applications Integration

## SUCCESS STORIES

### Intranet Portal for Major Automotive Company

The Customer engaged AgreeYa to revamp its existing Employee Intranet Portal, to cater to growing organizational needs. The new portal required improved collaborative environments, content and knowledge management, communication media, and information security. The new portal would provide access and information to 3,200+ employees and feature rich functionalities.

AgreeYa proposed a solution based on MOSS 2007. The entire project is to be completed in two phases. Phase 1 involves enterprise-level migration and restructuring of the current intranet portal from SharePoint 2000 to MOSS 2007. Phase 2 involves ad-hoc enhancements as per additional Customer requirements. This is an ongoing project and both on-site and off-site teams are involved in configuring and customizing the portal to deliver rich content and an improved user experience. This includes customizing web parts, forms, development of reports, and enriching the branded look and feel of the portal.

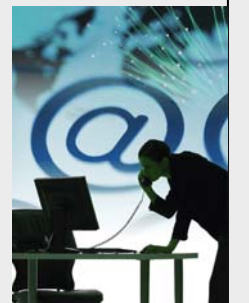

### Customized Portal for a Leading Technology Products and Solutions Company

This leading technology company offers consumers a wide range of products and services from digital photography to digital entertainment and from computing to home printing. They were in need of a customized portal for internal and external members of their extended sales team, to provide a centralized repository for all sales collateral and information.

AgreeYa was engaged by the Customer to identify requirements, configure Microsoft SharePoint Portal, develop custom screens and portlets, and deliver a uniquely branded portal for the Sales team. The overall scope of work for the project included:

- Design and implementation of a customized Sales Portal to meet business requirements
- Configuration and installation of MS SharePoint Services, Portal Server, Terminal Services, IIS 6.0
- Design of intuitive user experience for easy navigation and quick access of information
- Development of centralized, departmentally-structured document libraries
- Integration of Portal access to other corporate web resources
