

Virtual Desktops in the Cloud

Desktops the way you want. When you want. Anywhere you want.

Cloud computing's popularity means, for many of us, access to the services we want when we need it most, anytime, anywhere. For organizations, the cloud presents an opportunity to consume technology, including IT infrastructure, as a utility in order to maintain competitive advantage, achieve greater flexibility and maximize return on investments.

What is VDIXtend

VDIXtend is a solution that enables you to **easily provision and access hosted virtual desktops**. You can instantly provision VDIXtend virtual desktops for you and your team members that can be accessed anytime and from any computer or tablet, including the iPad and Android tablets. This means VDIXtend is also **perfect for your Bring Your Own Computer (BYOC) initiative**.

VDIXtend's **App Store** allows desktops to be configured with the applications the user needs, allowing you to **customize the environment for each user**. The App Store offers a variety of free and paid applications including Microsoft Office, Microsoft Visio, Skype and Quickbooks, and will always have the latest versions.

Over the course of the next five years, enterprises will spend \$112 billion cumulatively on software as a service (SaaS), platform as a service (PaaS), and infrastructure as a service (IaaS), combined.

Gartner press release,
June 22, 2010

Available Configurations	Basic Fully managed	Professional Fully managed with dedicated disk space	Offline Professional + access to Offline instance
---------------------------------	-------------------------------	--	---

Standard in all configurations: Windows 7, anti-virus, access to App Store, monthly patching, backup and recovery of personal files and full redundancy

Deployment Options

Public Cloud	Private Cloud	On-Premise	Hybrid
<ul style="list-style-type: none"> Shared infrastructure and server resources but each company's data and applications are separate Hosted in our world-class data center Built-in 128-bit encryption security Highly scalable Backups, upgrades and maintenance included 	<ul style="list-style-type: none"> Dedicated infrastructure and environment Hosted in our world-class data center Built-in 128-bit encryption security Highly scalable Backups, upgrades and maintenance included Appropriate for businesses that need customization and additional security 	<ul style="list-style-type: none"> Dedicated infrastructure and environment Hosted within customer's business environment Built-in 128-bit encryption security Backups, upgrades and maintenance included Appropriate for businesses that need ultimate control and security 	<ul style="list-style-type: none"> Combination of public or private cloud with on-premise

Benefits of AgreeYa's VDIXtend

By leveraging cloud computing, AgreeYa's VDIXtend ensures you get all the advantages of a sophisticated and responsive IT infrastructure at a fraction of the cost, without the hassles of managing the infrastructure yourself.

- **Zero upfront costs** – get a predictable monthly operating expense vs. capital expenditure; extend the lifespan of existing PCs or deploy thin clients that reduce hardware or CapEx
- **No software or hardware to deploy and manage** – do away software licensing expenditures, internal IT infrastructure resources and complex implementations
- **Quick and easy provisioning** – set up hundreds or thousands of virtual desktops in minutes from a web browser – no need to travel to remote sites to set up physical desktops
- **Flexibility in ramping up or down** – leverage the cloud to instantly scale up or scale down desktop users through on demand provisioning or decommissioning
- **Average savings of 50%** – at a cost of as low as \$1 per day, get substantial savings over traditional desktop environments
- **Easy access** – VDIXtend's virtual desktops can be accessed from any computer or tablet including iPad and Android tablets, as well as offline
- **Customized solutions** – customers can choose the appropriate software and applications configurations for each virtual desktop environment as well as pick how they would like to deploy the solution

Why AgreeYa for Virtualization and Cloud Computing

Collaborative and Customer First Approach: AgreeYa will work closely with you to help develop a customized solution that will minimize your TCO. We'll help you reach your CapEx/OpEx goals and determine what model best suits your needs (Physical, VDI On-Premise, Hosted VDI or a hybrid model).

Competitive Pricing: AgreeYa's VDIXtend is a low-priced hosted desktop in the cloud that allows you to instantly set up a fully functional Windows 7 environment for your users. Eliminate the high costs of having to invest in hardware and software, while maintaining control and security of your desktop infrastructure.

Excellent Customer Support: AgreeYa has the highest SLA standards for our customers as well as 24/7 email and phone support.

Dedicated Resources: AgreeYa assigns a dedicated team to each client to ensure that overtime we understand your organization and systems as well as you do. You will have direct access to this team throughout the set up process and after to support any needs you may have.

**Free 30 Day Trial
Available**

What VDIXtend means for you:

- Zero upfront costs
No software or hardware to deploy and manage
- Quick and easy provisioning of desktops
- Flexibility in ramping up or down
- Savings of 30-50%
- Access desktops offline, or from any computer or tablet
- Pick the applications you need and deploy the way you want
